Next.js

TypeScript

Jason Wright

Principal Frontend Engineer | React, Next.js, TypeScript | Frontend Architecture, Performance, Design Systems, Agentic Workflows
United Kingdom

Summary

Principal Frontend Engineer with 8+ years of experience building and modernising large-scale web applications in React, TypeScript, and Next.js, supported by 7 years of earlier business leadership at Amazon. My work sits at the intersection of frontend architecture, performance, product delivery, and team enablement. I specialise in taking complex or ageing product surfaces and turning them into faster, more maintainable, more scalable systems that teams can build on with confidence. At Vimeo, that included leading architecture across high-traffic viewing and workflow surfaces, rebuilding the core viewer experience, reducing page load times by 42.77% on a major legacy surface, and helping shape design system adoption and frontend quality across multiple teams. I work closely with product and design from early discovery and prototyping through to delivery, with a strong focus on maintainable systems, testing, documentation, and developer experience. I enjoy solving hard frontend problems involving state, rendering, responsive layouts, migration strategy, and platform consistency. More recently, I've been integrating AI-assisted and agentic workflows into my engineering practice, evolving from IDE autocomplete to more structured workflows for planning, scoping, prototyping, implementation support, and quality acceleration. I see these as tools that strengthen good engineering judgment rather than replace it. Before moving into software engineering, I spent 7 years at Amazon / LOVEFiLM in leadership roles across the UK, Germany, and the Nordics. That experience still shapes how I work today: I think deeply about business impact, customer experience, prioritisation, and how to help teams execute well under real-world constraints. Relocating to London in Summer 2026. Open to remote, hybrid, and on-site frontend engineering opportunities.

Experience

Vimeo

4 years 2 months

Principal Engineer

November 2024 - January 2026 (1 year 3 months)

Tokyo, Japan

Led frontend architecture and delivery across Vimeo's core viewing platform and workflow surfaces, improving performance, simplifying legacy systems, and enabling faster execution across globally distributed teams. Recognised by management as a "force multiplier" and a "key source of information, knowledge and insight" across the organisation.

Key achievements:

- Rebuilt Vimeo's primary video viewing surface serving 1.5M daily users / 45M monthly visits, designing a modular architecture of composable layouts, reusable UI elements, and data hooks that enabled rollout across core video pages, Showcase 2.0, and a bespoke China experience.
- Served as Technical Lead for Showcase 2.0 across teams in the US, Europe, and India, pivoting the technical approach mid-project after major requirement changes and delivering on time with strong product reception.
- Led a self-initiated audit and multi-quarter improvement roadmap for Video Settings, removing 13,293 lines of code, reducing page load time from 8.16s to 4.67s (-42.77%), and cutting bundle size from 1.68MB to 1.42MB (-15.5%).
- Improved key workflow surfaces including Upload, Video Settings, Global Navigation, Embed, and Distribution, identifying issues in quota limiting and upsell logic and helping strengthen conversion-related product flows.
- Contributed 50% of time to Frontend Platform / Design System work, supporting rollout of Vimeo's Chakra-based system through component development, guidance, documentation, and adoption support.
- Mentored engineers across teams and contributed to the Frontend Reviewers group, producing prototypes, walkthroughs, and structured documentation to improve reuse and onboarding.
- Increasingly integrated AI-assisted and agentic workflows into engineering practice for planning, scoping, prototyping, and delivery support while maintaining strong human review and code quality standards.

Consultant Engineer - Senior frontend

December 2021 - November 2024 (3 years)

Kanagawa, Japan

Joined Vimeo following the acquisition of Wirewax and helped lead the rebuilding of the Interactive Studio platform for Vimeo customers, establishing

architectural foundations, tooling, and engineering practices for a key product area.

- Scaffolded a greenfield frontend platform including tooling, code style, localisation, testing foundations, and engineering best practices for a complex interactive video product.
- Led migration from Create React App to Next.js, including routing redesign, authentication simplification, SSR compatibility updates, and build pipeline reconfiguration, delivering with zero production issues.
- Worked closely with product and design through discovery, prototyping, and implementation to improve UX quality and reduce delivery risk.
- Frequently operated across engineering, QA, planning, and product delivery responsibilities to maintain momentum and meet strict post-acquisition deadlines.

WIREWAX

4 years 4 months

Lead Front End Developer

February 2019 - January 2022 (3 years)

Kanagawa, Japan

Led frontend development for an interactive video SaaS platform spanning digital asset management, timeline-based editing, and visual design tooling.

- Owned frontend architecture, tooling decisions, coding standards, and best practices across a complex React and Redux application.
- Sole developer for wirewax.com, built with Gatsby and WordPress headless CMS, with a strong focus on performance, SEO, and customer acquisition.
- Core contributor to the interactive video player using React, Redux, Jest, Storybook, and video.js.
- Helped establish more maintainable frontend workflows through improved tooling, testing practices, and reusable UI patterns.

Junior Front End Developer

October 2017 - January 2019 (1 year 4 months)

London, United Kingdom

First professional engineering role. Built strong foundations in React, Redux, JavaScript, and production frontend delivery while contributing to a live interactive video platform.

General Assembly

6 months

Teaching Assistant

September 2017 - October 2017 (2 months)

London Area, United Kingdom

Supported Web Development and UX courses, teaching HTML, CSS, and JavaScript fundamentals shortly after completing the programme.

Web Development

May 2017 - September 2017 (5 months)

London, United Kingdom

A full time web development immersive course at General Assembly. A 12 week course that covered the programming essentials necessary to launch full-stack web apps, learning to solve problems with code while applying industry best practices in a collaborative environment.

Amazon

4 years 7 months

Buying Manager UK & DE - LOVEFiLM ByPost

October 2013 - November 2016 (3 years 2 months)

London Area, United Kingdom

Progressed from Assistant Buyer to European Buying Manager across LOVEFiLM and Amazon, covering the UK, Germany, and Nordic markets.

- Managed UK and German buying teams and led negotiations with major film studios and independent distributors.
- Designed and executed campaigns including a print insert reaching 1M+ Amazon retail customers.
- Held budget and P&L responsibility (£25m+) and contributed to business planning, roadmap development, and leadership reviews.
- Completed an international assignment in Gothenburg managing Nordic market buying operations.

UK Buying Manager - LOVEFiLM By Post

January 2013 - September 2013 (9 months)

London, United Kingdom

Buying Manager Nordics - LOVEFiLM By Post

May 2012 - December 2012 (8 months)

Gothenburg, Sweden

LOVEFiLM

2 years 6 months

Buyer

March 2011 - May 2012 (1 year 3 months)

Owned and drove relationships with 3 major film studios and the 10 largest independents. Making data driven purchasing decisions through development of forecasting models to drive cost reductions and consistently achieve KPI improvements.

Assistant Buyer

December 2009 - March 2011 (1 year 4 months)

Education

Academy of Contemporary Music - Guildford

Music Production, Music Technology · (2005 - 2008)

General Assembly

Web Development · (2017 - 2017)
